## Warning Labels

Illustrated below and continued on page 83 are some of the most commonly used warning labels complete with dimensions and various formats. The versions shown incorporate, in most instances, both words and pictorials. We recommend that whenever replacing or refinishing components originally displaying any labels, that the appropriate labels as specified in the owner's manual be used as a replacement to insure that proper safety precautions are observed and practiced.

**Note:** Labels supplied may differ from those illustrated as the latest revisions feature white lettering on black in the text areas. The wordless labels references are most commonly used on CE products for the European and international markets.
